In memory of Patrick Lee.

—Sam Noble

For Helen B, thanks for being so patient and understanding.

What a year we have to look forward to!

—Sam Bourton

*For my wonderful wife, Lena, and my
two amazing little girls, Anya and Alexia.*

—Allen Jones

Contents

| | |
|------------------------------------|------|
| About the Authors | xv |
| About the Technical Reviewer | xvii |
| Acknowledgments | xix |

■ CHAPTER 1 Building and Debugging WPF Applications 1

| | |
|--|----|
| 1-1. Create a Standard WPF Application | 1 |
| 1-2. Handle an Unhandled Exception | 4 |
| 1-3. Create and Use a Dependency Property | 7 |
| 1-4. Create a Read-Only Dependency Property | 13 |
| 1-5. Override a Dependency Property's Metadata | 15 |
| 1-6. Add a PropertyChangedCallback to Any Dependency Property | 19 |
| 1-7. Add Validation to a Dependency Property | 20 |
| 1-8. Create and Use an Attached Property | 24 |
| 1-9. Create a Dependency Property with Property Value Inheritance ... | 28 |
| 1-10. Merge Two Resource Dictionaries | 32 |
| 1-11. Define Application-wide Resources | 34 |
| 1-12. Reference a ResourceDictionary in a Different Assembly | 36 |
| 1-13. Share Properties Throughout an Application | 37 |
| 1-14. Create a Single-Instance Application | 42 |
| 1-15. Manage Multiple Windows in an Application | 46 |
| 1-16. Debug Data Bindings Using an IValueConverter | 51 |
| 1-17. Debug Bindings Using Attached Properties | 54 |

■ CHAPTER 2 Working with Windows, Forms, and Layout Management 57

| | |
|---|----|
| 2-1. Automatically Size the Main Application Window to Accommodate Its Content | 58 |
| 2-2. Arrange UI Elements in a Horizontal or Vertical Stack | 59 |
| 2-3. Arrange UI Elements into Automatically Wrapping Rows or Columns | 61 |
| 2-4. Dock UI Elements to the Edges of a Form | 63 |

| | |
|--|----|
| 2-5. Arrange UI Elements in a Grid | 65 |
| 2-6. Position UI Elements Using Exact Coordinates..... | 67 |
| 2-7. Display Content in a Multitabbed User Interface | 69 |
| 2-8. Display Content in a Scrollable User Interface | 70 |
| 2-9. Display Content in Resizable Split Panel..... | 73 |
| 2-10. Display Content in an Expander..... | 75 |
| 2-11. Place a Group Box Around a Set of UI Elements | 77 |
| 2-12. Display a Message Box..... | 78 |
| 2-13. Display a Pop-up Window | 81 |
| 2-14. Display a Border | 85 |
| 2-15. Display a Menu | 87 |
| 2-16. Display a Toolbar..... | 90 |
| 2-17. Display a Status Bar | 93 |
| 2-18. Control the Size of UI Elements in a Form | 94 |
| 2-19. Define the Tab Order of UI Elements in a Form | 97 |

■ CHAPTER 3 **Using Standard Controls** 99

| | |
|--|-----|
| 3-1. Display Control Content Surrounded by Braces..... | 100 |
| 3-2. Display Simple Text..... | 101 |
| 3-3. Display a Static Image | 103 |
| 3-4. Get Simple Text Input from a User..... | 104 |
| 3-5. Get Rich Text Input from a User..... | 111 |
| 3-6. Load or Save the Content of a RichTextBox | 115 |
| 3-7. Display a Password Entry Box | 119 |
| 3-8. Spell Check a TextBox or RichTextBox Control in Real Time | 120 |
| 3-9. Handle a Button Click | 122 |
| 3-10. Generate Click Events Repeatedly While a Button Is Clicked.... | 124 |
| 3-11. Set a Default Button | 126 |
| 3-12. Provide Quick Keyboard Access to Text Boxes | 128 |
| 3-13. Provide Quick Keyboard Access to Buttons | 129 |
| 3-14. Get User Input from a Slider..... | 131 |
| 3-15. Display a Context Menu | 134 |
| 3-16. Display a Tool Tip on a Control | 137 |
| 3-17. Display a Tool Tip on a Disabled Control | 139 |
| 3-18. Control the Display Duration and Position of a Tool Tip | 140 |
| 3-19. View and Select Items from a Set of Radio Buttons | 142 |
| 3-20. View and Select Items from a Set of Check Boxes | 145 |
| 3-21. View and Select Items Using a Tree | 149 |
| 3-22. View and Select Items Using a List..... | 153 |

| | |
|---|-----|
| 3-23. Dynamically Add Items to a List | 156 |
| 3-24. View and Select Items Using a Combo Box | 159 |
| 3-25. Display a Control Rotated | 162 |

CHAPTER 4 **Creating User and Custom Controls**..... 165

| | |
|---|-----|
| 4-1. Create a User Control | 166 |
| 4-2. Set the Content Property of a User Control | 168 |
| 4-3. Add Properties to a User Control | 171 |
| 4-4. Add Events to a User Control | 176 |
| 4-5. Support Application Commands in a User Control | 181 |
| 4-6. Add Custom Commands to a User Control | 185 |
| 4-7. Set Design Mode Behavior in a User Control | 191 |
| 4-8. Create a Lookless Custom Control | 193 |
| 4-9. Specify the Parts Required by a Custom Control | 198 |
| 4-10. Support UI Automation in a Custom Control | 202 |
| 4-11. Create a Custom-Drawn Element | 207 |
| 4-12. Create a Numeric TextBox Control | 212 |
| 4-13. Create a Scrollable Canvas Control | 217 |
| 4-14. Create a Zoomable Canvas Control | 221 |
| 4-15. Create a Drag Canvas Control | 225 |

CHAPTER 5 **Data Binding**..... 229

| | |
|--|-----|
| 5-1. Bind to a Property of a UI Element | 230 |
| 5-2. Create a Two-Way Binding | 231 |
| 5-3. Bind a Property of an Element to Itself | 234 |
| 5-4. Bind to CLR Objects | 235 |
| 5-5. Bind to an Existing Object Instance | 242 |
| 5-6. Bind to XML Data | 244 |
| 5-7. Bind to a Method | 247 |
| 5-8. Bind to a Command | 250 |
| 5-9. Bind to the Values of an Enumeration | 260 |
| 5-10. Specify a Default Value for a Binding | 262 |
| 5-11. Use Data Templates to Display Bound Data | 264 |
| 5-12. Use Value Converters to Convert Bound Data | 268 |
| 5-13. Use Data Triggers to Change the Appearance of Bound Data | 274 |
| 5-14. Select a DataTemplate Based on Properties of the Data Object | 278 |
| 5-15. Specify Validation Rules for a Binding | 283 |
| 5-16. Bind to IDataErrorInfo | 288 |
| 5-17. Bind to a Collection with the Master-Detail Pattern | 295 |

| | |
|--|-----|
| 5-18. Sort Data in a Collection | 302 |
| 5-19. Apply Custom Sorting Logic to a Collection | 304 |
| 5-20. Filter Data in a Collection | 307 |
| 5-21. Group Data in a Collection | 311 |
| 5-22. Apply Custom Grouping to a Collection. | 313 |
| 5-23. Bind to Application Settings | 317 |
| 5-24. Bind to Application Resource Strings | 321 |

■ CHAPTER 6 **Working with Styles, Templates, Skins, and Themes . . . 325**

| | |
|---|-----|
| 6-1. Create a Named Style | 325 |
| 6-2. Create a Typed Style | 327 |
| 6-3. Override Style Properties | 330 |
| 6-4. Inherit from a Common Base Style | 331 |
| 6-5. Change a Control's Appearance on Mouse Over | 333 |
| 6-6. Apply Multiple Triggers to the Same Element | 335 |
| 6-7. Evaluate Multiple Properties for the Same Trigger | 336 |
| 6-8. Programmatically Extract an Element's Style. | 338 |
| 6-9. Set a Style Programmatically | 341 |
| 6-10. Ignore an Implicit Style. | 343 |
| 6-11. Change the Appearance of Alternate Items in a List. | 345 |
| 6-12. Change the Appearance of a List Item When It's Selected. | 347 |
| 6-13. Create a Control Template | 349 |
| 6-14. Put a Control Template into a Style. | 351 |
| 6-15. Create a Control Template That Can Be Customized by Properties | 353 |
| 6-16. Specify Named Parts of a Control Template. | 354 |
| 6-17. Find ControlTemplate-Generated Elements | 356 |
| 6-18. Create a Custom ToolTip Style. | 358 |
| 6-19. Dynamically Change the Skin of an Application. | 361 |
| 6-20. Create Styles That Adapt to the Current OS Theme | 365 |

■ CHAPTER 7 **Working with Text, Documents, and Printing. 371**

| | |
|--|-----|
| 7-1. Programmatically Insert Text into a RichTextBox | 372 |
| 7-2. Apply Syntax Highlighting in a Text Control | 375 |
| 7-3. Print a WPF Visual | 379 |
| 7-4. Print a Collection of WPF Visuals | 382 |
| 7-5. Configure Printing Options Using a PrintTicket. | 386 |

| | |
|---|-----|
| 7-6. Print a Simple Document | 393 |
| 7-7. Asynchronously Print a Multipage FixedDocument | 398 |
| 7-8. Programmatically Create and Save a Simple FixedDocument | 404 |
| 7-9. Use Figures and Floaters in a FlowDocument | 408 |
| 7-10. Programmatically Create and Save a FlowDocument | 410 |
| 7-11. Asynchronously Save a FixedDocument to an XPS File | 415 |
| 7-12. Display a Document | 420 |
| 7-13. Annotate a Document with Sticky Notes | 425 |
| 7-14. Use Highlighting in a Document | 431 |
| 7-15. Load and Save User-Defined Annotations | 437 |
| 7-16. Print a Document's Annotations | 447 |

CHAPTER 8 **Multithreading**..... 453

| | |
|---|-----|
| 8-1. Execute a Method Asynchronously Using the Dispatcher Queue | 454 |
| 8-2. Load the Data for a Window Asynchronously After It Has Rendered | 457 |
| 8-3. Load the Items in a ListBox Asynchronously | 460 |
| 8-4. Check Whether You Are Running on the UI Thread | 464 |
| 8-5. Ensure That You Are Running on the UI Thread | 467 |
| 8-6. Execute a Method Asynchronously Using a Background Worker Thread | 469 |
| 8-7. Track the Progress of a Background Worker Thread | 473 |
| 8-8. Support the Cancellation of a Background Worker Thread | 476 |
| 8-9. Create a Background Worker Thread in XAML | 480 |
| 8-10. Update the UI Asynchronously on a Timer | 483 |
| 8-11. Show a Continuous Animation During an Asynchronous Process | 486 |
| 8-12. Show a ProgressBar While Processing on a Background Thread | 489 |
| 8-13. Show a Cancellable ProgressBar While Processing on a Background Thread | 493 |
| 8-14. Show a Continuous Progress Bar While Processing on a Background Thread | 496 |
| 8-15. Implement Application.DoEvents in WPF | 499 |
| 8-16. Create a Separate Thread for Each Window in a Multiwindow Application | 503 |

| | | |
|-------------------|---|-----|
| CHAPTER 9 | Working with 2D Graphics | 511 |
| | 9-1. Draw a Line | 512 |
| | 9-2. Draw a Sequence of Connected Lines | 513 |
| | 9-3. Format Lines | 515 |
| | 9-4. Draw a Curved Line | 518 |
| | 9-5. Draw Simple Shapes | 521 |
| | 9-6. Draw Complex Shapes | 523 |
| | 9-7. Create Reusable Shapes | 525 |
| | 9-8. Display a Tool Tip on a Shape | 528 |
| | 9-9. Display Graphics Elements in a Tool Tip | 530 |
| | 9-10. Use System Colors in Your Graphics | 531 |
| | 9-11. Draw or Fill a Shape Using a Solid Color | 533 |
| | 9-12. Fill a Shape with a Linear or Radial Color Gradient | 536 |
| | 9-13. Fill a Shape with an Image | 539 |
| | 9-14. Fill a Shape with a Pattern or Texture | 542 |
| | 9-15. Fill a Shape with a View of Active UI Elements | 546 |
| | 9-16. Apply Blur Effects on UI Elements | 548 |
| | 9-17. Apply a Glow Effect to Your UI Elements | 552 |
| | 9-18. Apply a Drop Shadow Effect to Your UI Elements | 554 |
| | 9-19. Scale, Skew, Rotate, or Position Graphics Elements | 558 |
| CHAPTER 10 | Working with 3D Graphics | 563 |
| | 10-1. Use 3D in Your Application | 564 |
| | 10-2. Use a 3D Camera | 566 |
| | 10-3. Draw a 3D Model | 570 |
| | 10-4. Light a Scene | 573 |
| | 10-5. Specify a Material for a Model | 578 |
| | 10-6. Apply Textures to a Model | 583 |
| | 10-7. Interact with 3D Objects | 586 |
| | 10-8. Use a 2D Control in a 3D Scene | 590 |
| CHAPTER 11 | Creating Animation | 595 |
| | 11-1. Animate the Property of a Control | 596 |
| | 11-2. Animate a Property of a Control Set with a Data Binding | 600 |
| | 11-3. Remove Animations | 604 |
| | 11-4. Overlap Animations | 609 |

| | |
|--|------------|
| 11-5. Animate Several Properties in Parallel | 611 |
| 11-6. Create a Keyframe-Based Animation | 614 |
| 11-7. Control the Progress of an Animation | 617 |
| 11-8. Animate the Shape of a Path | 620 |
| 11-9. Loop and Reverse an Animation | 623 |
| 11-10. Limit the Frame Rate of a Storyboard | 626 |
| 11-11. Limit the Frame Rate for All Animations in an Application | 629 |
| 11-12. Animate an Object Along a Path | 632 |
| 11-13. Play Back Audio or Video with a MediaTimeline | 635 |
| 11-14. Synchronize Timeline Animations with a MediaTimeline | 637 |
| 11-15. Receive Notification When an Animation Completes | 641 |
| 11-16. Animate the Color of a Brush with Indirect Property Targeting | 644 |
| 11-17. Control Animations Through Triggers | 646 |
| 11-18. Animate Text | 651 |
| CHAPTER 12 Dealing with Multimedia and User Input | 653 |
| 12-1. Play System Sounds | 653 |
| 12-2. Use Triggers to Play Audio When a User Interacts with a Control | 656 |
| 12-3. Play a Media File | 658 |
| 12-4. Respond When the User Clicks a UI Element with the Mouse | 663 |
| 12-5. Respond When the User Clicks a UI Element in a Container with the Mouse | 666 |
| 12-6. Respond When the User Rotates the Mouse Wheel | 669 |
| 12-7. Drag Items from a List and Drop Them on a Canvas | 672 |
| 12-8. Handle Keyboard Events | 676 |
| 12-9. Query Keyboard State | 679 |
| 12-10. Suppress Keyboard and Mouse Events | 682 |
| CHAPTER 13 Migrating and Windows Forms Interoperability | 685 |
| 13-1. Use WPF Windows in a Windows Forms Application | 686 |
| 13-2. Use WPF Controls in Windows Forms | 689 |
| 13-3. Use Windows Forms in a WPF Application | 693 |
| 13-4. Use Windows Forms Controls in a WPF Window | 696 |
| INDEX | 701 |

About the Authors

SAM NOBLE is a software developer who has been using .NET for several years in the land of academia, creating 3D graphics pipelines, artificial neural networks, image-processing tools, and a theoretical 4D spacetime computer compiler and emulator, amongst other things. Sam is currently a developer for SmithBayes where he has been using .NET 3.0+ industrially since the early CTP releases, fully embracing WPF and all it has to offer to create sophisticated strategic visualization tools.

SAM BOURTON is a technologist with ten years of commercial experience as a software designer and developer, across a wide variety of industries including e-commerce, telecoms, and Formula 1 motor racing. He has been using the .NET Framework since the very first beta and has been using WPF since the early CTPs. He has a passion for design patterns, application architecture, and best-practice object-oriented design and methodologies.

ALLEN JONES has 20 years of experience covering a wide range of IT disciplines in a variety of sectors; however, his true passion has always been software development. Allen is currently the the Chief Architect at SmithBayes, a UK-based firm that develops an agile decision platform which provides strategic decision support to senior executives in large corporations.

About the Technical Reviewer

TODD MEISTER has been developing and using Microsoft technologies for more than ten years. He has been a technical editor on more than 50 books on topics ranging from SQL Server to the .NET Framework. Besides technical editing books, he is an assistant director for computing services at Ball State University in Muncie, Indiana. He lives in central Indiana with his wife, Kimberly, and their four children. Contact Todd at tmeister@sycamoresolutions.com.

Acknowledgments

I would like to give thanks to everyone at Apress who made this book possible, in particular Sofia Marchant for her patience and guidance, Todd Meister for his technical edits, Kim Wimpsett for correcting all of my dodgy prose, Laura Cheu for the final reviews, and everyone else who I didn't have the fortune of talking to. To my coauthors and colleagues at SmithBayes, my family for all the love and support, and my friends for all the distractions and good times. Most importantly of all, to my wonderful girlfriend, Jayne, for all the love, support, encouragement, and understanding.

Sam Noble

I would like to thank everyone at Apress for working so hard to make this book a reality. And I would like to say a special thank you to my lovely Helen B. for being so patient and understanding, even whilst this book gradually and remorselessly sucked up all our free time together. I love you always. Finally, thanks must go to Little Kev and Rose "Miss Geek" Cobb, for love, adventures, and tech support.

Sam Bourton

Thanks again to all the crew at Apress for helping us get this book published: Dominic, Ewan, Sofia, Kim, Todd, Laura, and Tina. Thanks also to the two Sams for joining me in this endeavor and making this book possible.

Allen Jones
